

Storyboard Mockup - SeeFood - Group#29  
Arina Golikova, Sami Bouhussein, Chinhnam Nguyen

Home Page

if user has no diets saved, a popup would appear to let them know that there are no records saved

would include a popup that lets the user know if they are about to overwrite their current diet

-info hint that explains how to create an effective new diet plan. also includes information about the BMI calculator at the bottom of the screen

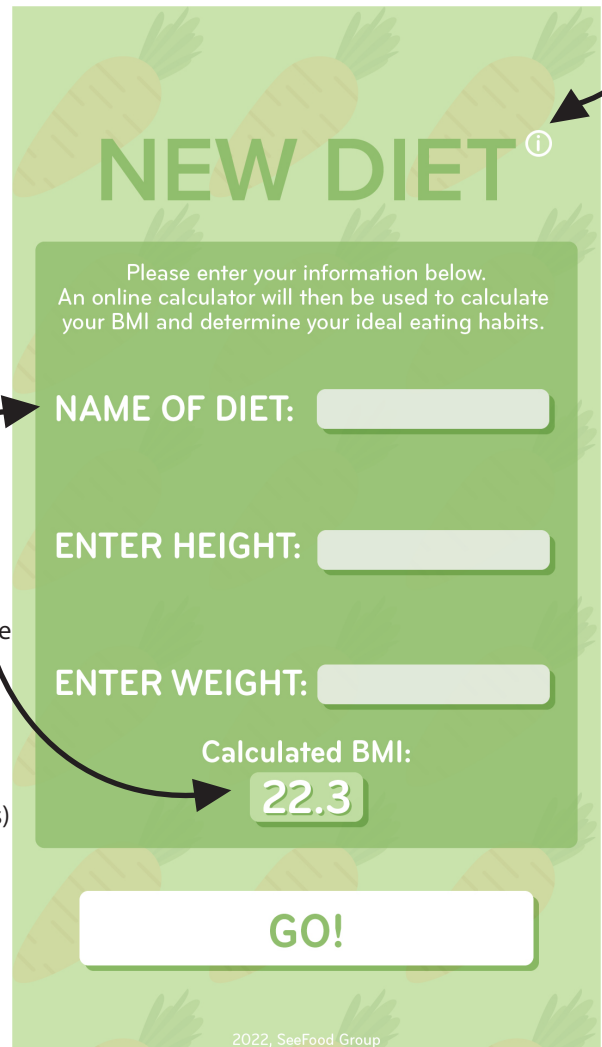

Users Diet

-add filters to make sure user inputs only string/numbers  
-find calculator online and calculate in real time

-info hint that gives user info regarding the table (what its for, how it works)

-allows user to filter and sort table values

-opens a new activity that displays diet statistics (pie charts, graphs, how many more cals needed, etc)  
-allows user to take or upload a picture  
-clears the users current diet from the system (displays popup asking the user if they are sure, first)

Create New Diet
